Date: 15 March 2026		Team ID: xxxxxx		Project Name: Credit Card Approval Prediction					
1 CUSTOMER SEGMENT(S) [CS]  - Credit card applicants (individuals seeking cards) - Bank credit analysts / underwriters - Financial institutions (banks, NBFCs)	2 PROBLEMS / PAINS + ITS FREQUENCY [PR]  - Manual approval is slow and time-consuming. - High rejection rate due to human errors. - Inconsistent decisions between analysts. - Frequent delays in processing applications. (Occurs Daily / Very Frequently)	3 TRIGGERS TO ACT [TR]  - Need for faster credit card approval. - Increasing number of applications. - Customer dissatisfaction due to long wait times. - Demand for data-driven and accurate decisions.	4 EMOTIONS BEFORE / AFTER [EM]  Before (Pain Points): - Worried about approval. - Uncertain about eligibility. - Frustrated with long waiting periods. After (Solution Impact): - Confident about eligibility. - Satisfied with quick result. - Relief with transparent process.	5 AVAILABLE SOLUTIONS PROS & CONS [AS]  1. Manual Verification ✓ Pros: Accurate, human judgment. - X Cons: Slow, costly, inconsistent. 2. Rule-based Scoring Systems ✓ Pros: Faster than manual. - X Cons: Less accurate, rigid rules. 3. Basic Credit Score Check ✓ Pros: Simple to use. - X Cons: Doesn't consider multiple factors.	6 CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL]  - Limited financial knowledge. - Incomplete or inaccurate information provided. - Limited access to high-end devices or stable internet. - Varying credit history availability.	7 BEHAVIOR + ITS INTENSITY [BE]  - Applicants frequently check eligibility before applying. - Banks process thousands of applications daily. - High expectation for quick and fair decision. (High Intensity)	8 CHANNELS OF BEHAVIOR [CH]  ONLINE - Web application - Bank website - Mobile browser / App OFFLINE - Bank branches - Customer service representatives - Phone support	9 PROBLEM ROOT / CAUSE [RC]  - Manual process and paperwork. - Large volume of applications to handle. - Inconsistent decision making. - Complex evaluation of financial & personal details. - Lack of real-time prediction & insights.	10 YOUR SOLUTION [SL]  A Machine Learning-based Credit Card Approval Prediction System that: - Collects applicant details through a web interface. - Preprocesses data and uses ML models (XGBoost / Scikit-learn) to predict approval. - Provides fast, accurate and reliable prediction (Approve / Reject). - Helps banks reduce risk, save time and improve customer satisfaction.
★ Outcome: Faster decision-making, reduced manual errors, improved customer satisfaction and efficient credit risk assessment.
