

Solution Architecture

Date	15 March 2026
Team ID	
Project Name	Credit Card Approval Predictio
Maximum Marks	4 Marks

Solution Architecture Diagram:

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides a web interface for users to enter applicant details and view prediction results.	HTML, CSS, Bootstrap, JavaScript
API Gateway	Receives user requests, validates input, and forwards data to the machine learning service.	Python, Flask
Microservices	Performs authentication, preprocesses data, executes ML algorithms, and generates approval predictions.	Python, Scikit-learn, XGBoost, Random Forest, Decision Tree
Database	Stores applicant information, prediction results, and trained machine learning models.	MySQL, Pickle (.pkl)
