

Technology Stack

Date	15 March 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Define Your Technology Stack:

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML5, CSS3, Bootstrap, JavaScript	Used to build a responsive, user-friendly interface for entering applicant details and displaying prediction results.

2	Backend / Server-Side	Python, Flask	Flask provides a lightweight framework for integrating the machine learning model and handling prediction requests efficiently.
3	Database / Data Storage	MySQL	Stores applicant details, prediction results, and user information in a structured relational database.
4	Cloud / Hosting / Deployment	IBM Watson Machine Learning, IBM Cloud	Deploys the trained machine learning model on the cloud for scalable, real-time predictions.
5	Version Control & CI/CD	Git, GitHub	Enables source code management, version tracking, and team collaboration.

6	Third-Party APIs / Other Tools	Scikit-learn, XGBoost, NumPy, Matplotlib, Jupyter Notebook	Used for data preprocessing, model training, evaluation, visualization, and experimentation during development.
